Distributed Real-Time Simulation in ADvantage 9

***Thursday June 15th
2:00 - 3:00 EDT***

ADI's ADvantage framework allows users to easily harness the power of distributed computing in real-time simulation. Join us in an online webinar as we demonstrate how to build, run, and interact with distributed simulations on ADI's rtX targets. Recently introduced features in the ADvantage 9 framework will be shown that will increase your testing efficiency and deliver results.
