

ADvantageSAS 9.0.2.14 Update Summary

This is a maintenance update, and includes ~50 modifications:

- Numerous fixes and enhancements to SIMplotter, ADvantageFC, and ADvantageDB.
- Modbus protocol support for ADvantageDB.
- Misc. fixes to License Server.
- Minor improvements and corrects to documentation.

Major Enhancements

This update includes the initial release of Version 9 ADvantageDE, ADvantageVI, rtX and GP runtime, ADEpt and Altia panel support, and a new Installer tool. All tools with Version 9 are supported on both Windows and Linux platforms.

These new applications include many new features, enhancements, and performance improvements. For more information, please refer to the documentation.

Limitations – with this initial version, some features available in Version 8 are not yet available:

- ADSIM model support
- LabVIEW panel support.
- COM interfaces – currently, only a limited set of functions in ADvantageVI is available.
- Distributed Simulation support – currently, only Ethernet and SCRAMnet are supported.

These features will be added as additional updates are distributed.

Please refer to the release notes for detailed information.
