

ADvantageSAS 1.0.2.10 Update Summary

This is a maintenance update, and includes ~45 modifications, primarily for ADvantageDB. These include:

- Several minor changes to ADvantageDB, primarily for Arinc429, and improved handling when opening database files from new locations.
- Several enhancements to SIMplotter, including a Trace Expression Wizard dialog, plotting performance improvements, and some fixes to the Python Variable Create and Chart Preview panes.

Note: some of these changes are related to logical device and ADvantageVI changes included in ADvantage update 8.4.0.12 or later.

Major Enhancements

There are no major enhancements in this update.

Please refer to the release notes for detailed information.
