

ADvantageSAS 1.0.2.4 Update Summary

This is a maintenance update, and includes ~20 modifications. Some minor changes include:

- A new Linux version of the Python distribution is included to resolve problem with loading additional Python modules.
- Some minor changes were made to correct issues found in some Simplot module script functions.
- Fixes were made to allow the loadxdr and queryxdr utilities to work with Matlab R2011b and newer versions.
- A system option was provided for sorting data set variable names to allow for easier selection.

Major Enhancements

This version includes the ability to have multiple Y axes on Strip charts:

This allows traces with widely varying ranges to be readable when plotted against each other.

Please refer to the release notes for detailed information.
