

# ADvantageSAS 1.0.2.7 Update Summary

---

This is a maintenance update, and includes ~15 modifications, primarily for ADvantageDB. These include:

- Several enhancements to Python scripting support.
- A few fixes and enhancements to file generation and field validation.
- Added Windows file icons and file type registration to allow double-clicking to open ADvantageDB files.

## Major Enhancements

This version adds support for new ADvantageDB based Aero1394 logical device.

Please refer to the release notes for detailed information.
