

ADvantageSAS 1.0.2.8 Update Summary

This is a maintenance update, and includes ~65 modifications, primarily for ADvantageDB. These include:

- Many improvements to ADvantageDB tabular view edit functionality.
- Several fixes and enhancements to ADvantageDB file generation, field validation, and Python script support.
- SIMplotter now includes access to the adatt Python module for report generation.

Note: several of these changes are related to logical device changes included in ADvantage update 8.4.0.11.

Major Enhancements

No major enhancements are included in this update.

Please refer to the release notes for detailed information.
