

# ADEPT 10.1.8 Update Summary

---

## 1 Minor Fixes / Enhancements

This maintenance update includes ~100 minor enhancements and fixes:

- Linux Client installation folder changed from /usr/local to /opt.
- Improved control for Event Log messages and messages from server now time-stamped with elapsed time for better diagnostics.
- Improved print control for ADEPT-GD, including customized header/footers, PDF, Postscript, and Image file formats.
- Changes to default selections in Installer and removal of rtX update. ADEPT-DE should now be used for server version updates.
- ADEPT Panel improvements for Popup Keyboard Touchscreen support, several Strip-Chart Component enhancements, and increased performance.
- Improved string handling for ADEPT-VI Get() and Put() Python functions.
- Numerous other Server and Client side minor fixes and enhancements.

## 2 Major Enhancements

- Support for several new rtX I/O hardware interfaces:
  - Ballard Omnibus II ARINC 429 board.
  - Magewell HDMI Capture Card
  - Touchscreen Interface
  - NAI 75G5 – LVDT TR-control, Resolver measurement and simulator, LVDT measurement and simulator
  - NI FPGA Quadrature Encoder
  - Thrustmaster USB Flight Controls
