

Applied Dynamics International  
invites you to attend

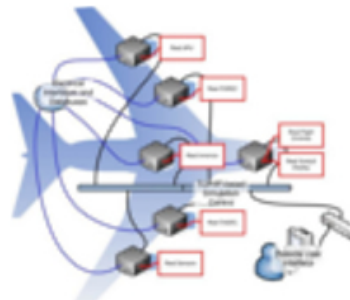

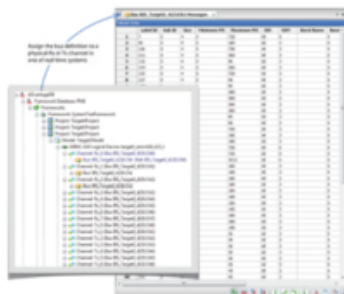

# ADvantage DB with CAN

Thursday, December 1st  
2:00 - 3:00 EST

Multi-protocol Communications Database

CAN is a communication protocol used widely throughout aircraft, automotive, and industrial systems. In this online training course, attendees will learn how to use ADvantageDB to effectively manage a system's CAN bus definitions. An overview of the CAN protocol will be given. Attendees will be shown how to properly define CAN messages to transmit and receive data within the simulation system, while utilizing ADvantageDB's linked framework and reference database architecture.
