

Applied Dynamics International  
invites you to attend

# ***Transitioning From Python 2 to Python 3*** ***Thursday, February 9th*** ***2:00 - 2:30 EST***

The ADvantage Simulation Asset Suite has recently updated the included Python 2.7 interpreter to Python 3.4. In this online training course we will discuss the generic changes that have been made between Python 2 & Python 3, and how these changes will affect currently existing scripts used in the ADvantage Framework. Options for automated script conversion will be explored, and several examples of ADvantage test script conversions will be presented.
